EXHIBIT "A"

Scope of Services

PGCS has read and agrees to the following Scope of Services outlined below to administer the Charlotte County's Self-Insurance Third Party Administration Program.

These services include: Workers' Compensation and Liability Claims Administration on behalf of the County.

1. Where appropriate, analyze medical information and the statements taken from witnesses, as well as contact and control claimants.

Workers' Compensation

The claims supervisor reviews each new Lost Time claim on the day it is received and provides specific written instruction to the assigned claims specialist within one workday of receipt. These instructions will assist the claims specialist with information to determine compensability, possible "red flags", subrogation (or other offset potential), as well as any jurisdictional or claims management issues. The claims specialist is then given a due date to return the claim to the supervisor within 7 days with the initial contacts (3-point contact) completed (within 1 business day) as well as a detailed claim review, thorough investigation, reserve recommendations and if possible the decision on compensability. The supervisor will follow up to verify that all criteria have been completed in a timely manner. Diaries are then set for follow up by the claims specialist, the supervisor, and the NCM if applicable.

If a detailed investigation is needed in order to determine compensability, this is assigned with employer approval without delay. Medical records may also need to be obtained in an expedited manner in order to make a compensability decision within 14 days.

Compensability investigations begin by reviewing the facts of each case. i.e.:

- Was the employee injured while performing his regular duties within the course and scope of his employment?
- Did the injury occur on the employer premises?
- Idiopathic?
- Are there any pre-existing conditions?
- Is the injured worker a "repeat claimant"?

The claims specialist or nurse case manager will obtain most of this information during the initial 3 point contact. If further investigation is needed in order to make a decision, recorded statements may be taken.

If PGCS recommends a denial of the claim based on the investigation results, the claims specialist will discuss the claim and request approval of denial from the County. The County will have final authority to determine if the claim should be denied. If the County approves the denial recommendation, PGCS will so notify the injured worker by DWC-12, and inform the County.

The following is an excerpt of the 3-Point contact from our Procedure Manual:

- PROMPT initial contact – within one business day. Verify SSN and Date of Birth. Each attempt needs to be thoroughly documented in system notes.

- Employer - Obtain all the details on the accident including subrogation potential and witnesses. Find out what type of employee he/she is. Inquire about light duty availability.

- Employee - Details of the accident, any prior workers' compensation claims, auto accidents or other injuries. A detailed medical history is vital to determining major contributing cause and compensability of the claim. Explanation should be given to the employee to notify the employer when released to light duty to determine if suitable employment is available within the restrictions. (Contact must be done within 1 business day)

- Medical provider – Contact with the medical provider to obtain a DWC-25 to document the diagnosis, prognosis, work status and future treatment plan. Explain that all authorizations should be approved by PGCS/AmeriSys.

- Investigation - all claims must be thoroughly investigated during the initial contacts. If compensability decision cannot be made within 14 days and a more detailed investigation is needed a 120-day letter will be sent and the case will be assigned to a vendor partner for recorded statements, medical sweep, and on-scene investigation if needed.

A file is exported and sent to ISO at the initial indemnity payment; any report received is scanned to the claim file. The claims specialist has the ability to request an ISO search at any time.

2. Monitor all claims referred to defense counsel for disposition. (Counsel to be named by County).
Defense counsel is assigned when it is apparent that the issues cannot be resolved between the claims specialist and opposing counsel. The claims specialist, with the approval of the County, will assign defense giving direction as to how to proceed with the defense of the file. The claims specialist will maintain communication with defense counsel and the client determining strategy on a go-forward basis to bring the file to fair and equitable resolution for all parties. In an effort to control costs, PGCS' philosophy is for the claims specialist to maintain control of the file rather than surrendering all to the direction of defense counsel.

3. Prepare appropriate payment instruments and agreements for the settlement of each claim obligation and medical bills considered proper.
PGCS with the County's approval, and settlement agreements prepared by defense counsel, will issue payments on the County's behalf for the settlement of claims and/or payments for properly submitted medical bills.

4. Investigate all accidents to determine fault.

It is PGCS policy that all reported claims will be investigated to fullest extent warranted. The claims specialist will perform the investigation to include all available information from the claimant, the account, witnesses, medical providers and experts if warranted. All determinations of compensability and all determinations of liability and the damages owed will be made in accordance with the laws.

5. Contact and maintain control on all claimants.

Contact with the physician and the injured worker and defense attorneys, if applicable, is done bi-weekly or more frequently if the claim/situation demands it. Files are maintained on a diary to help the claims specialist prioritize work.

6. Handling of all loss adjustments, investigations and settlements falling within and above the County's Self- Insured Retention.

Settlement can be costly and can greatly impact the financial standing of our clients. PGCS carefully weighs whether a settlement will be in the best interest of the client. Determination must be made on whether the claim has exceeded the self-insured retention level; if so, settlement authority is also obtained from the reinsurance carrier. Once the claims specialist has performed a full evaluation, the County is provided the facts and figures to support our position on the proposed settlement. Once the County has provided settlement authority, the claims specialist will discuss their offer with the injured employee or defense attorney. Prior to mediation the claims specialist evaluates the claim and makes their recommendation to the defense attorney for discussion on determining the best course of action, including the beginning and final offer. The claims specialist will lead all discussions with all parties, utilizing the attorney for legal advice.

7. Review all reported injury cases to determine if the Workers' Compensation Act is involved.

Compensability investigations begin by reviewing the facts of each case. i.e.:

- Was the employee injured while performing his regular duties within the course and scope of his employment?
- Did the injury occur on the employer premises?
- Idiopathic?
- Are there any pre-existing conditions?
- Is the injured worker a "repeat claimant"?

The claims specialist will obtain most of this information during the initial 3-point contact. If further investigation is needed in order to make a decision, recorded statements may be taken.

8. Determine compliance of the injuries and illnesses in accordance with the Workers' Compensation Act.

PGCS prides itself on customization of programs to maximize utilization management. It begins with ensuring compensability of the injury and the treatments being prescribed are related to the reported injury. Once that has been determined, then all measures are taken to return the injured employee back to gainful employment. Questions are posed to the Authorized Treating Physician (ATP) regarding functional limitations rather than blanket off work statements. This allows the County to maximize modified duty positions by focusing on what the injured employee can do, rather than what they cannot do. It is our goal to have and maintain an excellent rapport with the provider community. AmeriSys

offers peer to peer contact to help resolve any issues regarding medical necessity. It is in this way we ensure a strong relationship with the provider community that understands the intentions and goals of the County to provide an expedited and safe return to work for its employees, thereby lowering costs.

Coordination and referral to network medical providers allows for the best network penetration and the best network discounts.

The Telephonic Case-Manager (TCM) acts as the center point of contact ensuring delivery and communication to all approved providers of PBM and appropriate parties, forwarding appropriate issues to the utilization review department as necessary.

9. Determine eligibility and make payments of authorized medical benefits in accordance with the law.

The claims specialist will review all submitted medical bills and support medical documentation.

The claims specialist will approve medical bills within 3 days of receipt so that payments are processed on time.

The medical bill review system pairs professionally trained analysts with an automated cost containment system that has been developed specifically for Workers' Compensation claims, which will exceed your requirements. Our reviewers, along with a Registered Nurse when indicated, will identify un-bundling of surgical coding, hospital itemizations, over-utilization and medical necessity. The system is unique in that it has the ability to red flag the reviewer in the event that a provider has not billed in accordance with fee schedule rules. Our review process is indicated by the following criteria for each billing submitted.

a. Identify up-coding
b. Identify unbundling of outpatient, surgical, laboratory, or diagnostic procedures
c. Application of State Fee Schedule
d. Identification of Usual and Customary rates
e. Identification of unnecessary services/procedures
f. Identification of duplicate billings as well as possible duplicates
g. Identification of PPO discounts
h. Verification of pre-certification criteria and/or length of stay
i. Adjudication of payment, denial or request for additional information within 20 days.

10. Determine and request payment of temporary disability compensation as authorized in accordance with medical reports received, current medical fee schedule, rehabilitation efforts made, and reports by the employer.

The claim specialist will immediately review any and all medical reports received on the claim and make a determination if the employee is eligible for indemnity benefits.

11. Process all settlements and appear at hearings where required.

The claims specialist, the supervisor, if necessary, the County contact and the defense attorney, if involved, participate in the settlement conference. The settlement guidelines, including authority levels are determined at that time to assure that everyone is aware and

in agreement with the limitations and litigation strategy.

12. Review all open cases periodically to establish the status of disabled employees in order to assist in the settlement of their cases and report status to County's representative.

PGCS suggests the following meeting schedule. PGCS is dedicated to customize in-person and/or phone meetings/reviews to meet the needs of the County.

- Participate in an annual meeting with the County and appropriate attorneys to review all legal claims.
- Participate in an annual meeting with the County to review medical providers.
- Twice per year, meet with the County to review all open cases in order to assist in the settlement of the cases. Such reviews include a written plan of action and review and verification of outstanding reserves.
- Participate in quarterly meetings with County staff to review program-wide issues.
- Participate in monthly meetings to review all light duty claims and any other claims as requested by County staff.
- Participate in other meetings as required.
- PGCS staff is available to meet for any additional meetings throughout the year as requested by the County.

13. Determine the degree of permanent disability and wage loss. Recommend payment of wage loss benefits as authorized in accordance with the Statutes and/or settlements or awards.

All workers' compensation claims are evaluated for compensability, injury (type and occurrence), dependency, wage information and reserving. All of this is evaluated at the onset of each claim. The evaluation process will be clearly documented in the claims system.

14. Provide assistance in providing rehabilitation of injured employees in the consultation for retraining or reassignment of employees with limited physical performance arising from the injury.

PGCS will assist the County in arranging for rehabilitation or retraining of employees in appropriate cases. Charges for these programs shall be considered allocated expenses and charged to the County.

15. Where appropriate, analyze medical information and the statements taken from witnesses and contact claimants.

Liability

The liability claims specialists are responsible for providing thorough, accurate, timely communication and advice to the County in order to resolve any and all claim related issues. The claims specialist will handle all cases professionally in order to assure a mutually beneficial resolution in a timely and cost effective manner. The handling of the claims will involve, but not be restricted to:

a) Initial investigation to determine liability.
b) Investigation to determine the damages.
c) Identify and pursue any and all third party (subrogation) possibilities.
d) Establish, monitor and assure the accuracy of any reserves.
e) Notify the excess carrier of any claim that is catastrophic or has excess potential.
f) Adhere to all recommendations provided through the claim review process.
g) Prepare and manage all litigation.

h) Adhere to the timely filing of any and all legal documents.
i) Close all files as deemed appropriate on a timely basis.

It is policy that all reported claims will be investigated to the fullest extent warranted. The claims specialist will perform the investigation to include all available information from the injured employee, the account, witnesses, medical providers and experts if warranted. All determinations of liability and the damages owed will be made in accordance with the laws.

The claims specialist will perform an investigation including obtaining information from the injured employee, the account, witnesses, medical providers and experts. The claims specialist will gather documentation and obtain any estimates needed to properly evaluate the claim. This will include but not be limited to:

1. Recorded statement where warranted by liability and / or damages. A summary of this statement should be included with the tape.
2. Verification of any physical injuries will be made. With any claim involving a physical injury, a medical release form will be obtained.
3. The police and incident reports will be obtained on all claims.
4. The fire department reports will be obtained on all property claims.
5. Photographs will be taken on all property claims. Photographs will be dated and carry a description.
6. Estimates and/or appraisals will be obtained on all automobile physical/property damage claims. Photographs will be obtained on all automobile claims.

Report of Liability Claim

A liability claim is reported to the appropriate party by web entry, phone, email or fax, and entered to the system. The loss document is electronically entered to the claim in the system, which initiates a 'New Claim" diary for the claims specialist and the supervisor (in red) and creates a case note with the attachment. All subsequent documents received via mail are scanned and attached to the claim utilizing the appropriate case note type; faxes and emails are also attached to the claim. Each time a document is attached to the claim, a 'mail' diary is created for the claims specialist.

Claims Specialist Action

The 2-point contact will be completed by the claims specialist within one business day of receipt of the new claim notification diaried in the system and each contact will be documented in the system notes, including the person's name and telephone number.

Client Contact:

Client is contacted to discuss the claim and to secure the following information:

- Facts of loss, and all information available on identity of claimant(s)
- Does the client dispute liability on claim? If so, why?

Claimant Contact

Claimant is contacted to gather facts of the loss and the following data:

- The extent of the injury, if any, or damages being claimed.

- Current medical treatment and treating physician, if bodily injury is involved.

16. Assist in the collection of claims against others for damage to County's property and subrogation of liability claims. The County is seeking a TPA that will develop a Subrogation program to assist the recovery of expenses where appropriate, this should be clearly shown in proposers' response.

We carefully evaluate any and all subrogation possibilities and follow the claim to ensure the best recovery possible. Subrogation activities and recoveries are reported in the system.

PGCS handles Subrogation claims in-house.

The claims specialist will identify the potential for subrogation information gathered in the initial investigation of the claim, during which time contacts are made and available documentation such as official reports (police reports, etc.) are obtained. If the initial investigation indicates possible third party liability as a factor in the loss, the claim will be referred to the Subrogation Specialist for further review, and if subrogation potential exists, lien letters will be sent by certified mail to the appropriate parties. The claim will be placed on a diary so that contact is maintained with all parties in regard to the status of our subrogation and applicable timelines. Success is determined when all parties reach a consensus as to the amount of our lien recovery, with the Subrogation Specialist pursuing a maximum recovery.

Recoveries are reviewed, logged and prepared for entry by the Administrative Assistant and then entered to the system by the Accounting Dept. Recovery checks are then forwarded on to the attention of the designated representative at the client's location for deposit to the client's bank account. Each month, the Exception Register is reviewed by the Accounting Manager to verify all recoveries received have been entered properly. An Exception Register is sent monthly to the designated client representative detailing the recoveries received for that month. In addition, a copy of the recovery check and any supporting documentation is saved in the system claim file.

17. Make recommendations on salvage matters.

We carefully evaluate any and all salvage possibilities and follow the claim to ensure the best recovery possible. Salvage activities and recoveries are reported in the system and if it is determined that salvage recovery exists we will engage the services of a salvor to assist with the best recovery possible.

18. File all reports with the Excess Insurance carrier.

PGCS has a dedicated excess reporting unit for communication to and securing reimbursement from the excess and/or reinsurance carriers.

19. The service agent shall provide proper identification cards for all vehicles to show liability insurance coverage. These shall comply with the Florida Statutes covering insurance identification cards. The firm shall also provide accident kits for vehicles.

Accepted and Agreed.

20. Consult with the authorized County representatives on all questionable or contested cases.
PGCS will consult the authorized County representatives on all questionable claims and claims recommended for denial based on the investigation results. The claims specialist will discuss the claim and request approval of denial from the County. The County will have final authority to determine if the claim should be denied.

21. Maintain a current roster of acceptable physicians for treatment of industrial accidents on a first aid and specialized basis, as well as maintain procedures for establishing close liaison with the treating physician.
PGCS will assist the County in the selection of a panel of physicians or other providers of health care to initially treat employees and a panel of medical specialist to provide long-term or specialty care. The County will have final approval of any medical doctors placed into the provider care network. In order to facilitate timely continuation of ongoing medical treatment, PGCS will utilize services of the County for all referrals to and/or the selection of medical facilities and specialists.

22. The firm awarded the proposal must provide meaningful loss and claim information that shall include detail loss information on all losses and claims. The ability to access these reports online is a requirement. Reports should be by product line (i.e. Auto Comprehensive, Auto Collision, Auto Medical Payments, Auto Bodily Injury, Auto Property Damage, Property Loss, Building or Contents, Comprehensive General Liability). Reports shall show vehicle numbers, location of property loss, dates, claimant names, employee names, and department codes. The reports must be flexible and integrated so that it can be a truly worthwhile management information system to give current accurate and analytical data on the overall cost and in a manner acceptable to the County's Risk Manager. Reports shall be provided on a monthly basis in whatever reasonable quantity is desired and shall indicate, but not be limited to, the work location of the worker, claim number, date of accident, name of injured employee, description of accident, nature of injury, age and sex of the injured employee, department and division name & code, status of claim, and actual paid and reserve amounts of claims separated into medical and indemnity sections. All reports shall be filed with the County Risk Management Division on a monthly basis. All reports must be accessible via internet for client to run reports as designed and have user-friendly ad hoc reporting capability.
Accepted and Agreed.

Claim Access – Risk Management Information System

PGCS utilizes RISKMASTER, a comprehensive claims management solution, for both workers' compensation and property & liability claims. RISKMASTER is an occurrence/event based system which tracks claims around a central occurrence/event and tracks financials at both claim & event level. It captures a myriad of data elements ranging from type of accident, locations, NCCI coding for workers' compensation claims, all claimant information, litigation management, vehicle information, etc. RISKMASTER processes, manages and analyzes critical claims data for:

- General Liability
- Property and Casualty
- Workers' Compensation
- Automotive Liability
- Incident/Occurrence Administration
- First Reports of Injury (FROI)
- OSHA Compliance
- Insurance Policies
- Actuarial Reporting

- Adjuster/Case Management
- Funds Management
- EDI

For all claim types, the following information is tracked, but is not limited to:

- Persons involved (drivers, employees, witnesses, etc.)
- Adjuster information (including multiples)
- Litigation information
- Defendant information
- Claimant information (including attorney information)
- Location of incident
- Cause of incident
- All financial information across several lines

For vehicle accident claims, additional information is tracked:

- Accident type
- Accident description (coded types)
- Vehicle information linked to fleet information provided

For workers' compensation claims, additional information tracked is as follows:

- Dependents
- Restricted or work loss information
- Employment information
- OSHA information
- All NCCI information

The system provides flexibility to implement supplemental fields on any screen (event, claim, provider, payment, etc.) to track additional data elements. Examples would be a WC claim supplemental built to track presumption claims. Also another GL/Prop claim screen supplemental built to track catastrophe name.

Some additional important features to note:

- There are numerous code tables, all of which are user-defined And can be added or changed as needed.
- An extensive organizational hierarchy would allow 5 levels of customer-defined data to be used. Events are attached at the lowest level so aggregation can be done at any level needed.
- Multiple bank accounts can be setup at various levels in the organizational hierarchy.
- All claims are attached to policies which are entered to show every level of retention from the ground up or deductible up for each organization.
- Integration to outside systems for bill review, notice of injury/loss, etc.
- 1099 processing done seamlessly on each customer utilizing data from all or just certain bank accounts.

PGCS provides a claim portal to submit claims, generate reports, and review claims. The claim portal is based on a data warehouse which is updated nightly. Reports include loss runs and payment registers in multiple formats, including charts and graphs. There is no additional charge for user access to the claim portal. Permissions are based on both the

user role and the organization hierarchy. Real-time access to claims in RISKMASTER is available for a limited number of users and a per-user license fee. Permissions are based on both the user role and the organization hierarchy.

PGCS shall provide the County, at no additional cost, the ability to access comprehensive, real-time online electronic claim, financial and reporting data and information. PGCS shall provide the County regularly scheduled statistical and loss reports as agreed upon by the parties in an acceptable format. Data capabilities will include:

Loss runs will be provided on a monthly basis sorted separately by policy year and department/location. Loss runs will list each claim separately. Specific summary reports also will be provided.

PGCS will provide the County real-time, online access to all claim files, including adjuster notes, supervisory notes, case management notes, diary items, payment records, medical bills and expense bills in an electronic format with internet based access via our website at www.pgcs-tpa.com

PGCS will provide reporting capabilities to evaluate the success of the program and whether our staff, medical clinicians, associated services vendor(s), and contracted entities are performing services and achieving the best possible outcomes in an effective and efficient manner.

PGCS will provide the County with data and reports to comply with its annual audit and actuarial requirements.

23. The firm accepted shall furnish all necessary supplies, forms (i.e. claim forms, auto, general liability, notice of injury, prescription first fill forms), and related documentation at its own expense. Charlotte County desires to update all of its current forms with the selected vendor and where possible integrate electronic transfer of forms/documents to and from the selected Vendor and the county's RMIS system.
Accepted and Agreed.

24. The County currently uses a Risk Management Information System (RMIS) to enter claims as incidents, when the incident is converted into a claim it is electronically transmitted to the TPA. The proposer must provide a manner and methodology as to how they can accommodate a two-way interface with the RMIS. For the TPA claim intake (RMIS to TPA), the expectation will be that minimally the TPA can accept a data feed via SFTP on a daily basis. Preferably, the TPA will be able to accept files on a multiple times per day basis. For data going from the TPA to the RMIS (updating the claim files within the RMIS), please propose frequency of data transfer, what data transfer would be appropriate to exchange, at an expected frequency of weekly at a minimum.
At PGCS, we strive to maintain the security of the County's data as it is transmitted from one location to the other, therefore our preferred method of establishing two-way data transfer between systems is via SFTP. We can accept and send data on a daily, weekly or monthly frequency. Daily claims feed between systems would be ideal as this will keep the TPA and the RMIS system in sync.

The claim data feed to the County's RMIS through the SFTP, or other agreed upon platform, shall occur by 7:00AM each Monday. It shall be understood that claim data files that contain; incorrect claim numbers, duplicate claim numbers, or other identified claim file discrepancies, will be rejected by the County or their RMIS provider until such time as PGCS identifies and corrects the claim file feed. Further PGCS may be billed for service hours, that the County may incur from their RMIS provider for any incorrect claims data including incomplete files and/or duplicate claim numbers received from PGCS.

25. All penalties and interest incurred due to any Audit of Claims management by the State of Florida, or their representative(s), and shown to be the TPA's responsibility, shall be paid by the TPA. The County, or their representative reserves the right to request, and obtain in a format and place of the county's choosing, any documents including but not limited to Adjuster's Notes, Medical Bills, forms and the like necessary for the claims management services to comply with all applicable State, Federal and Administrative codes.
Accepted and Agreed.

PGCS will provide a representative of the Charlotte County Risk Management department read-only access to the Corrus claim system to view adjuster notes, medical bills, forms and the like for workers' compensation claims.

In accordance with the State of Florida regulations for time filing and payment, PGCS agrees to the following:

1. Timely mailing of Employee Information Packet
2. Timely payment of medical bills
3. Timely payment of indemnity benefits

PGCS will assume responsibility for State audit fines incurred if it is found PGCS did not meet the standards set forth by the State of Florida.

26. The County desires the TPA to be available in person, or via electronic means at a minimum, for Quarterly Claim File reviews for Workers' Compensation and Liability Claims.
PGCS agrees to meet in person or via electronic means at a minimum, for quarterly file reviews as the County prefers. PGCS staff is available to meet for any additional meetings throughout the year as requested by the County.

EXHIBIT "A"

Scope of Services

PGCS has read and agrees to the following Scope of Services outlined below to administer the Charlotte County's Self-Insurance Third Party Administration Program.

These services include: Workers' Compensation and Liability Claims Administration on behalf of the County.

1. Where appropriate, analyze medical information and the statements taken from witnesses, as well as contact and control claimants.

Workers' Compensation

The claims supervisor reviews each new Lost Time claim on the day it is received and provides specific written instruction to the assigned claims specialist within one workday of receipt. These instructions will assist the claims specialist with information to determine compensability, possible "red flags", subrogation (or other offset potential), as well as any jurisdictional or claims management issues. The claims specialist is then given a due date to return the claim to the supervisor within 7 days with the initial contacts (3-point contact) completed (within 1 business day) as well as a detailed claim review, thorough investigation, reserve recommendations and if possible the decision on compensability. The supervisor will follow up to verify that all criteria have been completed in a timely manner. Diaries are then set for follow up by the claims specialist, the supervisor, and the NCM if applicable.

If a detailed investigation is needed in order to determine compensability, this is assigned with employer approval without delay. Medical records may also need to be obtained in an expedited manner in order to make a compensability decision within 14 days.

Compensability investigations begin by reviewing the facts of each case. i.e.:

- Was the employee injured while performing his regular duties within the course and scope of his employment?
- Did the injury occur on the employer premises?
- Idiopathic?
- Are there any pre-existing conditions?
- Is the injured worker a "repeat claimant"?

The claims specialist or nurse case manager will obtain most of this information during the initial 3 point contact. If further investigation is needed in order to make a decision, recorded statements may be taken.

If PGCS recommends a denial of the claim based on the investigation results, the claims specialist will discuss the claim and request approval of denial from the County. The County will have final authority to determine if the claim should be denied. If the County approves the denial recommendation, PGCS will so notify the injured worker by DWC-12, and inform the County.

The following is an excerpt of the 3-Point contact from our Procedure Manual:

- PROMPT initial contact – within one business day. Verify SSN and Date of Birth. Each attempt needs to be thoroughly documented in system notes.

- Employer - Obtain all the details on the accident including subrogation potential and witnesses. Find out what type of employee he/she is. Inquire about light duty availability.

- Employee - Details of the accident, any prior workers' compensation claims, auto accidents or other injuries. A detailed medical history is vital to determining major contributing cause and compensability of the claim. Explanation should be given to the employee to notify the employer when released to light duty to determine if suitable employment is available within the restrictions. (Contact must be done within 1 business day)

- Medical provider – Contact with the medical provider to obtain a DWC-25 to document the diagnosis, prognosis, work status and future treatment plan. Explain that all authorizations should be approved by PGCS/AmeriSys.

- Investigation - all claims must be thoroughly investigated during the initial contacts. If compensability decision cannot be made within 14 days and a more detailed investigation is needed a 120-day letter will be sent and the case will be assigned to a vendor partner for recorded statements, medical sweep, and on-scene investigation if needed.

A file is exported and sent to ISO at the initial indemnity payment; any report received is scanned to the claim file. The claims specialist has the ability to request an ISO search at any time.

2. Monitor all claims referred to defense counsel for disposition. (Counsel to be named by County).
Defense counsel is assigned when it is apparent that the issues cannot be resolved between the claims specialist and opposing counsel. The claims specialist, with the approval of the County, will assign defense giving direction as to how to proceed with the defense of the file. The claims specialist will maintain communication with defense counsel and the client determining strategy on a go-forward basis to bring the file to fair and equitable resolution for all parties. In an effort to control costs, PGCS' philosophy is for the claims specialist to maintain control of the file rather than surrendering all to the direction of defense counsel.

3. Prepare appropriate payment instruments and agreements for the settlement of each claim obligation and medical bills considered proper.
PGCS with the County's approval, and settlement agreements prepared by defense counsel, will issue payments on the County's behalf for the settlement of claims and/or payments for properly submitted medical bills.

4. Investigate all accidents to determine fault.

It is PGCS policy that all reported claims will be investigated to fullest extent warranted. The claims specialist will perform the investigation to include all available information from the claimant, the account, witnesses, medical providers and experts if warranted. All determinations of compensability and all determinations of liability and the damages owed will be made in accordance with the laws.

5. Contact and maintain control on all claimants.

Contact with the physician and the injured worker and defense attorneys, if applicable, is done bi-weekly or more frequently if the claim/situation demands it. Files are maintained on a diary to help the claims specialist prioritize work.

6. Handling of all loss adjustments, investigations and settlements falling within and above the County's Self- Insured Retention.

Settlement can be costly and can greatly impact the financial standing of our clients. PGCS carefully weighs whether a settlement will be in the best interest of the client. Determination must be made on whether the claim has exceeded the self-insured retention level; if so, settlement authority is also obtained from the reinsurance carrier. Once the claims specialist has performed a full evaluation, the County is provided the facts and figures to support our position on the proposed settlement. Once the County has provided settlement authority, the claims specialist will discuss their offer with the injured employee or defense attorney. Prior to mediation the claims specialist evaluates the claim and makes their recommendation to the defense attorney for discussion on determining the best course of action, including the beginning and final offer. The claims specialist will lead all discussions with all parties, utilizing the attorney for legal advice.

7. Review all reported injury cases to determine if the Workers' Compensation Act is involved.

Compensability investigations begin by reviewing the facts of each case. i.e.:

- Was the employee injured while performing his regular duties within the course and scope of his employment?
- Did the injury occur on the employer premises?
- Idiopathic?
- Are there any pre-existing conditions?
- Is the injured worker a "repeat claimant"?

The claims specialist will obtain most of this information during the initial 3-point contact. If further investigation is needed in order to make a decision, recorded statements may be taken.

8. Determine compliance of the injuries and illnesses in accordance with the Workers' Compensation Act.

PGCS prides itself on customization of programs to maximize utilization management. It begins with ensuring compensability of the injury and the treatments being prescribed are related to the reported injury. Once that has been determined, then all measures are taken to return the injured employee back to gainful employment. Questions are posed to the Authorized Treating Physician (ATP) regarding functional limitations rather than blanket off work statements. This allows the County to maximize modified duty positions by focusing on what the injured employee can do, rather than what they cannot do. It is our goal to have and maintain an excellent rapport with the provider community. AmeriSys

offers peer to peer contact to help resolve any issues regarding medical necessity. It is in this way we ensure a strong relationship with the provider community that understands the intentions and goals of the County to provide an expedited and safe return to work for its employees, thereby lowering costs.

Coordination and referral to network medical providers allows for the best network penetration and the best network discounts.

The Telephonic Case-Manager (TCM) acts as the center point of contact ensuring delivery and communication to all approved providers of PBM and appropriate parties, forwarding appropriate issues to the utilization review department as necessary.

9. Determine eligibility and make payments of authorized medical benefits in accordance with the law.

The claims specialist will review all submitted medical bills and support medical documentation.

The claims specialist will approve medical bills within 3 days of receipt so that payments are processed on time.

The medical bill review system pairs professionally trained analysts with an automated cost containment system that has been developed specifically for Workers' Compensation claims, which will exceed your requirements. Our reviewers, along with a Registered Nurse when indicated, will identify un-bundling of surgical coding, hospital itemizations, over-utilization and medical necessity. The system is unique in that it has the ability to red flag the reviewer in the event that a provider has not billed in accordance with fee schedule rules. Our review process is indicated by the following criteria for each billing submitted.

a. Identify up-coding
b. Identify unbundling of outpatient, surgical, laboratory, or diagnostic procedures
c. Application of State Fee Schedule
d. Identification of Usual and Customary rates
e. Identification of unnecessary services/procedures
f. Identification of duplicate billings as well as possible duplicates
g. Identification of PPO discounts
h. Verification of pre-certification criteria and/or length of stay
i. Adjudication of payment, denial or request for additional information within 20 days.

10. Determine and request payment of temporary disability compensation as authorized in accordance with medical reports received, current medical fee schedule, rehabilitation efforts made, and reports by the employer.

The claim specialist will immediately review any and all medical reports received on the claim and make a determination if the employee is eligible for indemnity benefits.

11. Process all settlements and appear at hearings where required.

The claims specialist, the supervisor, if necessary, the County contact and the defense attorney, if involved, participate in the settlement conference. The settlement guidelines, including authority levels are determined at that time to assure that everyone is aware and

in agreement with the limitations and litigation strategy.

12. Review all open cases periodically to establish the status of disabled employees in order to assist in the settlement of their cases and report status to County's representative.

PGCS suggests the following meeting schedule. PGCS is dedicated to customize in-person and/or phone meetings/reviews to meet the needs of the County.

- Participate in an annual meeting with the County and appropriate attorneys to review all legal claims.
- Participate in an annual meeting with the County to review medical providers.
- Twice per year, meet with the County to review all open cases in order to assist in the settlement of the cases. Such reviews include a written plan of action and review and verification of outstanding reserves.
- Participate in quarterly meetings with County staff to review program-wide issues.
- Participate in monthly meetings to review all light duty claims and any other claims as requested by County staff.
- Participate in other meetings as required.
- PGCS staff is available to meet for any additional meetings throughout the year as requested by the County.

13. Determine the degree of permanent disability and wage loss. Recommend payment of wage loss benefits as authorized in accordance with the Statutes and/or settlements or awards.

All workers' compensation claims are evaluated for compensability, injury (type and occurrence), dependency, wage information and reserving. All of this is evaluated at the onset of each claim. The evaluation process will be clearly documented in the claims system.

14. Provide assistance in providing rehabilitation of injured employees in the consultation for retraining or reassignment of employees with limited physical performance arising from the injury.

PGCS will assist the County in arranging for rehabilitation or retraining of employees in appropriate cases. Charges for these programs shall be considered allocated expenses and charged to the County.

15. Where appropriate, analyze medical information and the statements taken from witnesses and contact claimants.

Liability

The liability claims specialists are responsible for providing thorough, accurate, timely communication and advice to the County in order to resolve any and all claim related issues. The claims specialist will handle all cases professionally in order to assure a mutually beneficial resolution in a timely and cost effective manner. The handling of the claims will involve, but not be restricted to:

a) Initial investigation to determine liability.
b) Investigation to determine the damages.
c) Identify and pursue any and all third party (subrogation) possibilities.
d) Establish, monitor and assure the accuracy of any reserves.
e) Notify the excess carrier of any claim that is catastrophic or has excess potential.
f) Adhere to all recommendations provided through the claim review process.
g) Prepare and manage all litigation.

h) Adhere to the timely filing of any and all legal documents.
i) Close all files as deemed appropriate on a timely basis.

It is policy that all reported claims will be investigated to the fullest extent warranted. The claims specialist will perform the investigation to include all available information from the injured employee, the account, witnesses, medical providers and experts if warranted. All determinations of liability and the damages owed will be made in accordance with the laws.

The claims specialist will perform an investigation including obtaining information from the injured employee, the account, witnesses, medical providers and experts. The claims specialist will gather documentation and obtain any estimates needed to properly evaluate the claim. This will include but not be limited to:

1. Recorded statement where warranted by liability and / or damages. A summary of this statement should be included with the tape.
2. Verification of any physical injuries will be made. With any claim involving a physical injury, a medical release form will be obtained.
3. The police and incident reports will be obtained on all claims.
4. The fire department reports will be obtained on all property claims.
5. Photographs will be taken on all property claims. Photographs will be dated and carry a description.
6. Estimates and/or appraisals will be obtained on all automobile physical/property damage claims. Photographs will be obtained on all automobile claims.

Report of Liability Claim

A liability claim is reported to the appropriate party by web entry, phone, email or fax, and entered to the system. The loss document is electronically entered to the claim in the system, which initiates a 'New Claim" diary for the claims specialist and the supervisor (in red) and creates a case note with the attachment. All subsequent documents received via mail are scanned and attached to the claim utilizing the appropriate case note type; faxes and emails are also attached to the claim. Each time a document is attached to the claim, a 'mail' diary is created for the claims specialist.

Claims Specialist Action

The 2-point contact will be completed by the claims specialist within one business day of receipt of the new claim notification diaried in the system and each contact will be documented in the system notes, including the person's name and telephone number.

Client Contact:

Client is contacted to discuss the claim and to secure the following information:

- Facts of loss, and all information available on identity of claimant(s)
- Does the client dispute liability on claim? If so, why?

Claimant Contact

Claimant is contacted to gather facts of the loss and the following data:

- The extent of the injury, if any, or damages being claimed.

- Current medical treatment and treating physician, if bodily injury is involved.

16. Assist in the collection of claims against others for damage to County's property and subrogation of liability claims. The County is seeking a TPA that will develop a Subrogation program to assist the recovery of expenses where appropriate, this should be clearly shown in proposers' response.

We carefully evaluate any and all subrogation possibilities and follow the claim to ensure the best recovery possible. Subrogation activities and recoveries are reported in the system.

PGCS handles Subrogation claims in-house.

The claims specialist will identify the potential for subrogation information gathered in the initial investigation of the claim, during which time contacts are made and available documentation such as official reports (police reports, etc.) are obtained. If the initial investigation indicates possible third party liability as a factor in the loss, the claim will be referred to the Subrogation Specialist for further review, and if subrogation potential exists, lien letters will be sent by certified mail to the appropriate parties. The claim will be placed on a diary so that contact is maintained with all parties in regard to the status of our subrogation and applicable timelines. Success is determined when all parties reach a consensus as to the amount of our lien recovery, with the Subrogation Specialist pursuing a maximum recovery.

Recoveries are reviewed, logged and prepared for entry by the Administrative Assistant and then entered to the system by the Accounting Dept. Recovery checks are then forwarded on to the attention of the designated representative at the client's location for deposit to the client's bank account. Each month, the Exception Register is reviewed by the Accounting Manager to verify all recoveries received have been entered properly. An Exception Register is sent monthly to the designated client representative detailing the recoveries received for that month. In addition, a copy of the recovery check and any supporting documentation is saved in the system claim file.

17. Make recommendations on salvage matters.

We carefully evaluate any and all salvage possibilities and follow the claim to ensure the best recovery possible. Salvage activities and recoveries are reported in the system and if it is determined that salvage recovery exists we will engage the services of a salvor to assist with the best recovery possible.

18. File all reports with the Excess Insurance carrier.

PGCS has a dedicated excess reporting unit for communication to and securing reimbursement from the excess and/or reinsurance carriers.

19. The service agent shall provide proper identification cards for all vehicles to show liability insurance coverage. These shall comply with the Florida Statutes covering insurance identification cards. The firm shall also provide accident kits for vehicles.

Accepted and Agreed.

20. Consult with the authorized County representatives on all questionable or contested cases.
PGCS will consult the authorized County representatives on all questionable claims and claims recommended for denial based on the investigation results. The claims specialist will discuss the claim and request approval of denial from the County. The County will have final authority to determine if the claim should be denied.

21. Maintain a current roster of acceptable physicians for treatment of industrial accidents on a first aid and specialized basis, as well as maintain procedures for establishing close liaison with the treating physician.
PGCS will assist the County in the selection of a panel of physicians or other providers of health care to initially treat employees and a panel of medical specialist to provide long-term or specialty care. The County will have final approval of any medical doctors placed into the provider care network. In order to facilitate timely continuation of ongoing medical treatment, PGCS will utilize services of the County for all referrals to and/or the selection of medical facilities and specialists.

22. The firm awarded the proposal must provide meaningful loss and claim information that shall include detail loss information on all losses and claims. The ability to access these reports online is a requirement. Reports should be by product line (i.e. Auto Comprehensive, Auto Collision, Auto Medical Payments, Auto Bodily Injury, Auto Property Damage, Property Loss, Building or Contents, Comprehensive General Liability). Reports shall show vehicle numbers, location of property loss, dates, claimant names, employee names, and department codes. The reports must be flexible and integrated so that it can be a truly worthwhile management information system to give current accurate and analytical data on the overall cost and in a manner acceptable to the County's Risk Manager. Reports shall be provided on a monthly basis in whatever reasonable quantity is desired and shall indicate, but not be limited to, the work location of the worker, claim number, date of accident, name of injured employee, description of accident, nature of injury, age and sex of the injured employee, department and division name & code, status of claim, and actual paid and reserve amounts of claims separated into medical and indemnity sections. All reports shall be filed with the County Risk Management Division on a monthly basis. All reports must be accessible via internet for client to run reports as designed and have user-friendly ad hoc reporting capability.
Accepted and Agreed.

Claim Access – Risk Management Information System

PGCS utilizes RISKMASTER, a comprehensive claims management solution, for both workers' compensation and property & liability claims. RISKMASTER is an occurrence/event based system which tracks claims around a central occurrence/event and tracks financials at both claim & event level. It captures a myriad of data elements ranging from type of accident, locations, NCCI coding for workers' compensation claims, all claimant information, litigation management, vehicle information, etc. RISKMASTER processes, manages and analyzes critical claims data for:

- General Liability
- Property and Casualty
- Workers' Compensation
- Automotive Liability
- Incident/Occurrence Administration
- First Reports of Injury (FROI)
- OSHA Compliance
- Insurance Policies
- Actuarial Reporting

- Adjuster/Case Management
- Funds Management
- EDI

For all claim types, the following information is tracked, but is not limited to:

- Persons involved (drivers, employees, witnesses, etc.)
- Adjuster information (including multiples)
- Litigation information
- Defendant information
- Claimant information (including attorney information)
- Location of incident
- Cause of incident
- All financial information across several lines

For vehicle accident claims, additional information is tracked:

- Accident type
- Accident description (coded types)
- Vehicle information linked to fleet information provided

For workers' compensation claims, additional information tracked is as follows:

- Dependents
- Restricted or work loss information
- Employment information
- OSHA information
- All NCCI information

The system provides flexibility to implement supplemental fields on any screen (event, claim, provider, payment, etc.) to track additional data elements. Examples would be a WC claim supplemental built to track presumption claims. Also another GL/Prop claim screen supplemental built to track catastrophe name.

Some additional important features to note:

- There are numerous code tables, all of which are user-defined And can be added or changed as needed.
- An extensive organizational hierarchy would allow 5 levels of customer-defined data to be used. Events are attached at the lowest level so aggregation can be done at any level needed.
- Multiple bank accounts can be setup at various levels in the organizational hierarchy.
- All claims are attached to policies which are entered to show every level of retention from the ground up or deductible up for each organization.
- Integration to outside systems for bill review, notice of injury/loss, etc.
- 1099 processing done seamlessly on each customer utilizing data from all or just certain bank accounts.

PGCS provides a claim portal to submit claims, generate reports, and review claims. The claim portal is based on a data warehouse which is updated nightly. Reports include loss runs and payment registers in multiple formats, including charts and graphs. There is no additional charge for user access to the claim portal. Permissions are based on both the

user role and the organization hierarchy. Real-time access to claims in RISKMASTER is available for a limited number of users and a per-user license fee. Permissions are based on both the user role and the organization hierarchy.

PGCS shall provide the County, at no additional cost, the ability to access comprehensive, real-time online electronic claim, financial and reporting data and information. PGCS shall provide the County regularly scheduled statistical and loss reports as agreed upon by the parties in an acceptable format. Data capabilities will include:

Loss runs will be provided on a monthly basis sorted separately by policy year and department/location. Loss runs will list each claim separately. Specific summary reports also will be provided.

PGCS will provide the County real-time, online access to all claim files, including adjuster notes, supervisory notes, case management notes, diary items, payment records, medical bills and expense bills in an electronic format with internet based access via our website at www.pgcs-tpa.com

PGCS will provide reporting capabilities to evaluate the success of the program and whether our staff, medical clinicians, associated services vendor(s), and contracted entities are performing services and achieving the best possible outcomes in an effective and efficient manner.

PGCS will provide the County with data and reports to comply with its annual audit and actuarial requirements.

23. The firm accepted shall furnish all necessary supplies, forms (i.e. claim forms, auto, general liability, notice of injury, prescription first fill forms), and related documentation at its own expense. Charlotte County desires to update all of its current forms with the selected vendor and where possible integrate electronic transfer of forms/documents to and from the selected Vendor and the county's RMIS system.
Accepted and Agreed.

24. The County currently uses a Risk Management Information System (RMIS) to enter claims as incidents, when the incident is converted into a claim it is electronically transmitted to the TPA. The proposer must provide a manner and methodology as to how they can accommodate a two-way interface with the RMIS. For the TPA claim intake (RMIS to TPA), the expectation will be that minimally the TPA can accept a data feed via SFTP on a daily basis. Preferably, the TPA will be able to accept files on a multiple times per day basis. For data going from the TPA to the RMIS (updating the claim files within the RMIS), please propose frequency of data transfer, what data transfer would be appropriate to exchange, at an expected frequency of weekly at a minimum.
At PGCS, we strive to maintain the security of the County's data as it is transmitted from one location to the other, therefore our preferred method of establishing two-way data transfer between systems is via SFTP. We can accept and send data on a daily, weekly or monthly frequency. Daily claims feed between systems would be ideal as this will keep the TPA and the RMIS system in sync.

The claim data feed to the County's RMIS through the SFTP, or other agreed upon platform, shall occur by 7:00AM each Monday. It shall be understood that claim data files that contain; incorrect claim numbers, duplicate claim numbers, or other identified claim file discrepancies, will be rejected by the County or their RMIS provider until such time as PGCS identifies and corrects the claim file feed. Further PGCS may be billed for service hours, that the County may incur from their RMIS provider for any incorrect claims data including incomplete files and/or duplicate claim numbers received from PGCS.

25. All penalties and interest incurred due to any Audit of Claims management by the State of Florida, or their representative(s), and shown to be the TPA's responsibility, shall be paid by the TPA. The County, or their representative reserves the right to request, and obtain in a format and place of the county's choosing, any documents including but not limited to Adjuster's Notes, Medical Bills, forms and the like necessary for the claims management services to comply with all applicable State, Federal and Administrative codes.
Accepted and Agreed.

PGCS will provide a representative of the Charlotte County Risk Management department read-only access to the Corrus claim system to view adjuster notes, medical bills, forms and the like for workers' compensation claims.

In accordance with the State of Florida regulations for time filing and payment, PGCS agrees to the following:

1. Timely mailing of Employee Information Packet
2. Timely payment of medical bills
3. Timely payment of indemnity benefits

PGCS will assume responsibility for State audit fines incurred if it is found PGCS did not meet the standards set forth by the State of Florida.

26. The County desires the TPA to be available in person, or via electronic means at a minimum, for Quarterly Claim File reviews for Workers' Compensation and Liability Claims.
PGCS agrees to meet in person or via electronic means at a minimum, for quarterly file reviews as the County prefers. PGCS staff is available to meet for any additional meetings throughout the year as requested by the County.

In addition, if Risk Management determines that heretofore, unreasonably or unavailable types of insurance coverage or coverage limits become reasonably priced or available, the Risk Manager or designee is authorized, but not required, to change the above insurance requirements to require additional types of insurance coverage or higher coverage limits, provided that any such change is reasonable in light of past claims against the County, inflation, or any other item reasonably related to the County's risk. Any change requiring additional types of insurance coverage or higher coverage limits must be made by amendment to this contract.
