

Exhibit A Amended Summary Project Specifications

The Project is intended to construct a new SR 31 alignment necessary to widen and reconstruct State Road 31 in Lee County and Charlotte County, from an existing two-lane undivided rural roadway to a four-lane divided facility from south of State Road 78 (Bayshore Road) in Lee County to Horseshoe Road in Charlotte County plus the necessary transitions and connections between the new alignment and the existing roadway. The new alignment will consist of a four-lane divided facility expandable to six-lanes from State Road 78 to Cypress Parkway in Charlotte County and from Cypress Parkway to Horseshoe Road it will be widened from the existing two-lane undivided facility to an ultimate four-lane divided facility. The project includes Chain of Lakes drainage improvements to address the historical overtopping of State Road 31 within the project limits. The regional drainage improvements will extend to just north of Cook Brown Road. The total project length is approximately 5.36 miles plus the necessary transitions and connections between the new alignment and the existing roadway. The project will add four new lanes and a median, access management improvements, traffic signals or roundabouts, bike lanes, and multi-modal regional trails. The project will include the provision of construction engineering and inspection services to the Department for all improvements to State Road 31. The project will also include the acquisition of required right-of-way by the Department.
