Weeks Marine Inc. v. Gloucester County Improvement Authority, No. GLO-L-00577-17	Weeks filed an action May 5, 2017 in New Jersey State Court. The litigation arises from a project awarded to Weeks in January 2011 for the Paulsboro Marine Terminal Bulkhead, Dredging and Upland Site Preparation Project in Paulsboro, NJ. Weeks asserted a Differing Site Condition in August 2013 alleging the dredging to be significantly more difficult (harder material) than shown on the geotechnical information included with the bid package. The issue had previously been negotiated and settled but, due to reasons outside Weeks’ control, the Owner withdrew its offer. A contract mandated mediation was held between the parties on April 10, 2017 but was unsuccessful. The litigation is ongoing.	Plaintiff: Cohen Segalis, PC George E. Pallas, Esq. Spud attachments were developed and the subject of a Wilco Patent which was in turn manufactured by EIK International, a Malaysian company, who then sold marsh buggies incorporating the technology to Weeks. Weeks purchased the EIK product subject to an indemnity to patent infringement. Wilco claims that it had a patent on "amphibious vehicles" employing the use of this accessory. Wilco's patent employs apparent technology that was market available many decades prior to the patent.
